PROFILE

Skilled Software Test Engineer with expertise in manual and automated testing. Proficient in designing and implementing Automation Testing Frameworks using POM, Selenium WebDriver, Allure Report, and Jenkins. Experienced in API testing with Swagger and Postman, and performance testing using JMeter. Adept at creating and executing test cases, logging and tracking bugs in Jira, and integrating CI pipelines. Strong collaborator with a focus on delivering high-quality software and optimizing usability.

PROFESSIONAL EXPERIENCE

Quality Assurance Tester at A Technologies – CRM Domain

08/2024 – present

Automation Testing Framework Development:

- Designed and implemented a robust Automation Testing Framework using the Page Object Model (POM) design pattern for scalability and maintainability.
- Authored detailed and comprehensive automation test cases to ensure reliability and quality.
- Developed a custom test runner for efficient execution of test cases.
- Integrated Allure Report for clear, comprehensive test reporting and visualization.
- Configured and utilized Jenkins for Continuous Integration (CI) to automate test workflows and ensure smooth deployment cycles.
- Added logging mechanisms and listeners to facilitate real-time monitoring, debugging, and troubleshooting.

API Testing: Conducted extensive API tests using Swagger and Postman to verify data integrity, functionality, and system interactions within the CRM environment.

Test Case Design and Execution: Created and executed detailed test cases based on user stories, ensuring alignment with project goals and user requirements.

Performance Testing: Performed load and stress testing using JMeter, assessing system responsiveness and stability under various conditions to improve CRM application performance.

Bug Tracking and Issue Retesting: Logged, tracked, and retested issues in Jira, supporting efficient bug resolution and accurate defect documentation for continuous improvement.

Collaboration and Reporting: Collaborated with development and QA teams to ensure smooth project execution, contributing to meetings and providing status updates on testing progress and findings.

SKILLS

Technical Skills:

Testing Tools: Selenium, TestNG, Allure Report, Maven, Jenkins, Swagger, Postman, JMeter, Jira, Trello, Zephyr, Azure DevOps and JUNIT.

Programming Languages: Java, C, C++.

Additional Knowledge: SQL basics, object- oriented programming, data structures for embedded systems (stack, queue, linked list).

Soft Skills:

Excellent communication and interpersonal abilities.

Ability to work effectively in a team environment.

Attention to detail and a commitment to quality.

EDUCATION

BSc. Of Electronic Engineering

10/ 2017 – 07/2022

Faculty of Electronic Engineering

Department: Industrial electronics and control engineering department.

Accumulative Grade: Very Good.

Graduation Project Grade: Excellent.

PROJECTS

Bank Account Management System - Manual Testing

Performed manual testing for a banking application as part of Guru99 training.

- Created, executed, and documented detailed test cases to verify key functionalities, including account creation, deposits, withdrawals, fund transfers, and balance inquiries.
- Logged, tracked, and reported defects using (Google Sheet).
- Performed regression testing to verify bug fixes and ensure overall stability before release

Figma Website Functional Testing- UI Testing

- Create test scenarios and test case on **Jira** (using **Zephyr**).
- Perform functional and non-functional testing for all features.
- Generate Bug reports with traceability feature in Jira.

TRAINING

Software Testing Course (Udemy)

Basics of Software Engineering, ISTQB Certification Preparation-Fundamental of Testing, Testing Principles and Concepts, Manual Testing, Performance Testing using JMeter and API testing with Postman.

LANGUAGES

English: Very Good.
